

Il Progetto Alta Qualità in 12 punti.

# 1

The Rocca Sveva Estate focuses on small production of indigenous Veronese varietals. The Rocca Sveva objective is to make wines of the best quality and most expressive of the Veronese terroir.

# 2

Grapes used for the Rocca Sveva wines are all estate grown. The grapes are vinified, aged, and bottled all at the Rocca Sveva Estate.

# 3

The Rocca Sveva Estate uses the best and most advanced research to monitor the estate's terroir and vineyards. Only wines achieving the highest quality are accepted to carry the Rocca Sveva name.

# 4

The Rocca Sveva vineyards are carefully managed by our agronomists to assure that the best methods for cultivating typicity and quality are followed.

The Gujot training – method is used exclusively for the cultivation of the red grapes.

# 5

The Rocca Sveva agronomists accurately monitor the exact status of the vineyards to determine the optimal time to harvest.

The grapes from each vineyard row are analyzed.

When a row's analysis comes back with perfect results authorization for harvest is given.

6

The 150 hectares of Rocca Sveva vineyard plots are all on the more prestigious hillsides and are positioned with the best facings.

# 7

Rocca Sveva conducts green harvests (pruning) to assure that the maturation on each plant will be no more than 6 to 7 grape bunches.

# 8

Rocca Sveva harvests only by hand thus assuring only the best and most mature grapes to be harvested.

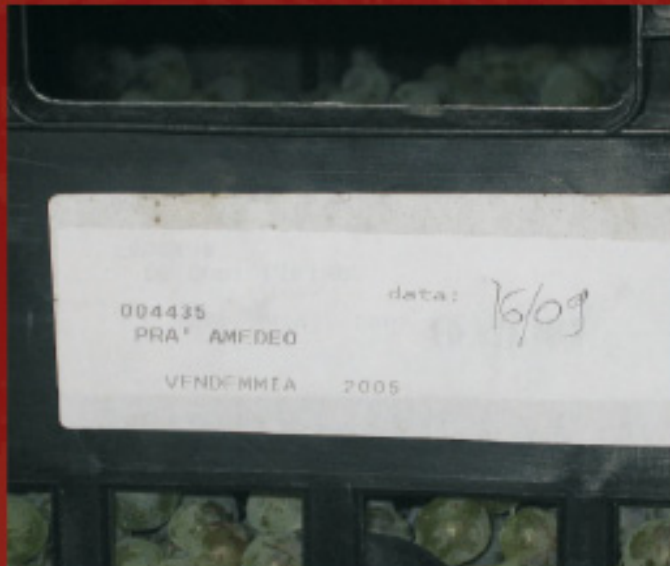

# 9

To further guarantee controls for excellent quality, Rocca Sveva protects the harvested grapes from being crushed by placing them into special bins. These bins guarantee the grape's integrity and help facilitate grape inspection upon the delivery to the winery.

# 10

Each grape bin is tagged with the farmer's identity. This tracking method helps Rocca Sveva maintain further controls and adds another layer of quality insurance

# 11

The Rocca Sveva Estate is a first rate winery: 2500 square meters of cellars excavated into rock.

1500 barriques (225 liters of wine) 35 casks of 70, 130, and 160 hectoliter

# 12
